

## **Purpose of the Feasibility Study:**

The purpose of this study is to take a first look at the alternatives and determine which alternatives could be studied further during a Phase 1 Planning Study. Access along the corridor would be reviewed at that time.

## **Potentially Impacted Buildings:**

Orange dots indicate buildings that may be impacted and could result in a relocation of a business, partial removal or reconfiguration of a building, or reconfiguration of parking.

**PLEASE NOTE:** The impacts and costs shown are approximate and will be further evaluated if/when the project progresses into a Phase 1 study.
